Software Applications Developer AD-2210-00 Job Announcement

Software Applications Developer, Arlington, VA

INTRODUCTION:

This position is located in the Arlington, VA, Office of the Special Inspector General for Afghanistan Reconstruction (SIGAR) and reports directly to the Chief Information Officer (CIO), or his designee. In this capacity, the Software Applications Developer will develop and maintain data applications in support of the mandated quarterly report to Congress.

The Software Applications Developer will serve as a technical expert, analyst, and advisor to the SIGAR and its CIO on a broad spectrum of technical issues related the management and publication of information that supports the SIGAR mission.

MAJOR DUTIES:

Develops, modifies and maintains SIGAR business applications written in Microsoft SQL, ASP .NET 3.5 or higher, ASP, CSS, VB script, and Access.

Assists maintaining and modifying existing web applications and the general web infrastructure of the intranet.

Assists and supports the leadership, integrative management, and direction for SIGAR's information systems, to include Audit SharePoint records management system, Investigation Case Management System (CMS), SIGAR Online database, and Forensic Audit CMS. Assists in the use of appropriate information technologies to enhance economy, efficiency and effectiveness in Afghanistan reconstruction and the oversight requirements of the SIGAR. In this capacity, performs complex analysis of project and financial data to support the creation of reports and graphics for publications that support the SIGAR mission.

Plans, coordinates, develops guidance for and leads comprehensive analyses to improve the overall integration of SIGAR's mission.

Knowledge Requirements:

A minimum of five years of experience working with Microsoft SQL Server in creating, managing and maintaining databases. Working knowledge of database coding using the latest tools available on the market i.e., .ASP, .NET, CSS, VB Script, Visual Studios. General knowledge of cloud information as service products. SharePoint experience would be a plus.

Broad knowledge of advanced software systems and computer techniques, requirements, methods, sources, procedures, and performance measurement tools; system instructions of existing automated systems with SIGAR; management principles and policies and standards relating to telecommunications and software systems. As staff specialist, must have expert knowledge of a variety of computer and telecommunications systems to recommend methods for enhancing information management programs through modifications and application of evolving technology.

Knowledge of analytical techniques and automated tools to perform assignments (as minimum, the ability to use database management, spreadsheets, graphics, and communication applications software).

Knowledge of mission, functions, organizational structure, and acquisition policy, regulations, and laws for related information systems, and Department of Defense (DOD) office structures.

Ability to communicate written and oral instructions, directives and briefings in authoritative, clear, concise and logical terms of implementing procedures making assignments and presenting recommendations and conclusions.

Key Requirements:

Candidates for this position:

- may be considered essential to the overall support of the SIGAR mission. If considered emergency essential, failure to meet emergency essential requirements may result in separation for the efficiency of the Federal Service (Ch. 75, Title 5 USC; FPM Ch. 752).
- may be required to submit an Executive Branch Confidential Financial Disclosure Report.
- must complete a Form SF 312, Classified Information Nondisclosure Agreement.
- must be eligible for and be able to maintain a SECRET clearance.

Overseas travel may be required. In support of this travel, the Software Applications Developer will be required to meet minimum standards of fitness for deployment to the CENTCOM region to include the ability to wear personal protective equipment, including protective mask, ballistic helmet, body armor, and chemical/biological protective garments.

Reemployment of Annuitants:

Reemployed Annuitants may be eligible for appropriate pay rate for the position without a reduction in pay or of the annuity. As a result, the salary of the annuitant is not offset by the amount of the annuity received for the period of employment.

Applicants should send a resume by electronic transmission, to jobs@sigar.mil or fax 703-602-8753 Attention: Human Resources- Software Applications Developer Announcement.
